

FOR IMMEDIATE RELEASE

## DxO OpticsPro v10.4 now supports the Nikon D7200 and the Olympus OM-D E-M5 Mark II

**April 15, 2015** – DxO announces the immediate availability of DxO OpticsPro v10.4, DxO FilmPack v5.1.2, and DxO ViewPoint v2.5.4 for Mac and Windows. These upgrades allow the three DxO solutions to process images taken with the new Nikon D7200 and the Olympus OM-D E-M5 Mark II. Among other new features, DxO OpticsPro v10.4 now offers a one-click reset function, and includes support for several DxO Optics Modules.

### Improved workflow and new DxO Optics Modules

DxO OpticsPro 10 offers many automatic tools for processing RAW and JPEG images. Its library of presets allows photographers to automatically bring out the best in their photos as soon as they open them in the application, or to adapt the processing to their tastes by applying one of many available styles or by making manual adjustments to correction settings. To further improve workflow, the DxO OpticsPro v10.4 interface now offers a new “Reset” button that lets users cancel in just one click all of the manual corrections made to an image and to return to the default preset corrections.

DxO OpticsPro v10.4 also offers support for new camera/lens combinations: 466 additional Optics Modules are available, offering support for Canon, Nikon, Olympus, Panasonic, Samyang, Sigma, Tamron, Tokina, Voigtlander and Zeiss lenses for many Canon, Fuji, Nikon and Olympus cameras. Among these are the new Sigma 24mm F1.4 DG HSM A Canon-mount lens, the Canon EF11-24mm f/4L USM wide-angle zoom, and the much-anticipated AF-S NIKKOR 400mm f/2.8E FL ED VR.

### Availability

DxO OpticsPro v10.4, DxO FilmPack v5.1.2, and DxO ViewPoint v2.5.4 are immediately available in the DxO online store ([shop.dxo.com](http://shop.dxo.com)) and at photo resellers.

Photographers who acquired a DxO OpticsPro 9 license on or after September 1, 2014, are entitled to a free upgrade to version 10. Photographers who bought a DxO FilmPack 4 license on or after September 1, 2014, are entitled to a free upgrade to version 5. Upgrades are free for all photographers who acquired a DxO ViewPoint license on or after August 1, 2013.

Fully-functional trial versions of these three software products, good for one month, are available on the DxO website: <http://www.dxo.com/us/photography/download>.

### About DxO

We are scientists dedicated to the art of photography.

DxO is a photography technology company that specializes in the processing of digital images. It designs, licenses, and distributes solutions that are recognized for their excellence in image processing to imaging industrialists and experts, the public, and the photo press.

DxO's range of products and services cover the entire imaging chain: embedded image processing technologies in cameras, image quality testing and measurement tools, and photography software designed for the end consumer.

Our scientists and engineers believe photographs are more than pictures: they have the power to become icons of people's lives. We create products and technologies that help them transform everyday moments into enduring memories.
