## About DxO Optics Pro

DxO Optics Pro is an award-winning automatic image enhancement software for enthusiastic amateur and professional photographers shooting in JPEG or RAW format. World-renowned for its unique automated optical corrections (distortion, vignetting, chromatic aberrations, lens softness), and its state-of-the-art RAW conversion, DxO Optics Pro addresses the entire spectrum of image quality issues, including noise removal, exposure optimization, keystone correction, color control and dust removal. Its fully-customizable and easy-to-use interface makes it an unrivalled productivity tool, able to process hundreds of images in just a few clicks.

## About DxO Labs

DxO Labs offers products and solutions that provide excellence in digital imaging. In addition to its DxO Optics Pro and DxO FilmPack products for Mac and Windows, aimed at serious and demanding photographers, the company also licenses patented intellectual property serving the entire digital imaging chain:

- Embedded software and silicon architectures for real-time still and video image processing for consumer electronics OEM/ODM (such as digital camera and camera phone vendors);
- Image quality evaluation and measurement tools for imaging component suppliers (camera module manufacturers, sensor vendors, and processor vendors) as well as for photography journalists and imaging experts.
