FOR IMMEDIATE RELEASE

DxO ONE Early Access program for Android now available

PARIS – DxO, a pioneer in digital imaging technology, is pleased to introduce its DxO ONE Early Access program for Android. Open to anyone with a compatible smartphone or tablet, the program gives users the opportunity to start using the new DxO ONE for Android right away. In addition to helping improve the overall user experience by sharing their feedback with DxO, Early Access participants will receive regular firmware updates with all the latest features.

The DxO ONE's essential features are now available for Android, including photo and video capabilities in all modes (auto, scene, semi-auto, and manual), related shooting settings (aperture, sensitivity, exposure time, exposure compensation, etc.), and Direct Wi-Fi connectivity. The Android app also lets users read, share, transfer, and delete photos and videos when the DxO ONE is connected to the phone. DxO will be adding new features over the next several months, including live video streaming via Facebook Live, time-lapses, manual focus, and the ability to transfer, delete, or share multiple photos or videos at a time.

Supported Android devices

The DxO ONE Android is equipped with a Type-C USB connector. To ensure the best possible user experience, DxO has tested a range of Android devices for compatibility. To date, the DxO ONE Android supports the following models:

- HTC U11
- Huawei mate 9
- Huawei P10
- LG G6
- LG V20

- Moto Z
- Nexus 5X
- Nokia 8
- Nubia Z11 mini
- Samsung Galaxy A5 2017
- Samsung Note 8
- Samsung S8
- Huawei Honor 9

This [list](#) will continue to expand to reflect the needs of Early Access program participants.
