

ViewPoint 2

Windows and OS X

System requirements

Microsoft® Windows®

- Intel Core® 2 Duo, AMD Athlon™ 64 X2 or higher.
- 2 GB of RAM (4 GB recommended)
- 400 MB of available disk space
- Microsoft® Windows® 7 Service Pack 1 (64-bit), Microsoft® Windows® 8 (64-bit), Microsoft® Windows® 8.1 (64-bit), Microsoft® Windows® 10 (64-bit)
- 1024x768 or higher screen resolution

Apple OS X

- Intel Core™ i5 or higher
- 2 GB of RAM (6 Go recommended)
- 400 MB of available disk space
- OS X 10.8 (Mountain Lion), 10.9 (Mavericks), 10.10 (Yosemite), 10.11 (El Capitan), 10.12 (Sierra)
- 1024x768 or higher screen resolution

Installation and activation

- We recommend that you install the latest Microsoft updates for Windows before installing the application.
- The standalone application along with the Adobe Photoshop, Lightroom, Elements, and Apple Aperture plug-ins can all be installed by downloading and running the appropriate installer from the DxO website.
- One license allows you to install DxO ViewPoint on two different computers (Mac and / or PC).
- Activating one instance of DxO ViewPoint automatically activates all the other instances installed on the same machine (for example, activating the standalone application also activates the Adobe Photoshop and Lightroom plug-ins).
- To activate the DxO ViewPoint v2.1.7 plugin for Photoshop CC 2014 after the upgrade in Windows, you will need to do a complete reinstallation of DxO ViewPoint.
- In case of an upgrade from version 216 or older, the plugin for Photoshop CC cannot be activated without a complete reinstallation of the software.

Compatible host applications

- DxO OpticsPro 10 or later
- Adobe® Photoshop® CS3, CS4, CS5, CS6, CC, CC 2014, CC 2015, CC 2015.5 (32- & 64-bit)
- Adobe® Photoshop® Elements® 9, 10, 11, 12, 13
- Adobe® Photoshop® Lightroom® 3, 4, 5, 6
- Apple Aperture® 3
